Issue 20 – May 2007

XHTML Compliant DotNetNuke 4.4. and 4.5 - part 2

<http://www.dnncreative.com/XHTMLCompliantDotNetNukepart2/tabid/341/Default.aspx>

Below you will find a list of the files included with the video tutorials and the folders where they need to be uploaded to. Make sure you upload the files related to your DotNetNuke version.

Make sure you backup your DotNetNuke installation files before applying these changes and test this first in a local installation. We accept no responsibility for corrupted installations, portals, data loss etc.

4.5.1

Default.aspx - upload to main DNN installation folder

No Container.ascx – upload to Portals / _default / Containers / _default folder

ClientAPICaps.config - upload to js folder

DotNetNuke.WebUtility.dll – upload to bin folder

labelcontrol.ascx – upload to controls folder

signin.ascx – upload to admin / security folder

4.4.1

Default.aspx - upload to main DNN installation folder

HtmlModule – upload to DesktopModules / HTML folder

(Make sure you download the latest web controls installation files for ASP.NET 2.0, follow the readme file included with the download) – download from www.dotnetnuke.com

No Container.ascx – upload to Portals / _default / Containers / _default folder

DotNetNuke.WebUtility.dll – upload to bin folder

labelcontrol.ascx – upload to controls folder

signin.ascx – upload to admin / security folder
