

Internet Sharing skin

The skin comes complete with six content panes:

- Top pane
- Content pane
- Content left pane
- Content mid pane
- Content right pane
- Right pane

And also comes with 6 containers:

- h1 container
- h2 container
- h3 container
- h3_lowercontent_panes
- h3_right_pane
- transparent, no title container

Using the skin:

We recommend using the following containers in the following content panes:

- top pane: transparent_no_title
- content pane: h2 title or h1 title or h3 title (recommend the h2 title container)
- contentleftpane, contentmidpane, contentrightpane: h3_lower_content_panes
- rightpane: h3_right_pane

When using these containers, the header tags are placed around the title of the module.

Main Menu

Is only set up to display the main root menu items, it does not display sub-menu items

Admin Menu:

Note that when you log in as administrator or host, the menu is accessed from the bottom of the page

Content Pane Styling

Title sub heading

To add a sub-heading underneath the main module title use the “description” class, ie:

```
<p class="description">People like to share files, but what will the future bring?</p>
```

Images

To allow text to wrap around images in the content pane use the “thumbnail” class ie:

```

```

Right Pane Images

Text automatically wraps around any images placed in the right pane
